

CARLOS MORALES

SOFTWARE ENGINEER

Barcelona, Anzoátegui, Venezuela • (+58) 0412-8816-267 • carlos52.7624@gmail.com

<https://moralesmortales.github.io/professional/>

SUMMARY

High-impact Software Engineer with 5 years of experience specializing in robust back-end system architecture and optimization. Expert in **Python (Django)**, **JavaScript (Node.js)**, focusing on code refactoring to enhance system quality. Proven ability to take full ownership of projects and leverage **DevOps practices (Docker, CI/CD)**. A technical leader who has mentored over 10 junior developers and delivered a **20% reduction in system latency** and a **50% reduction in core database query time**.

PROFESSIONAL EXPERIENCE

Karanta, Software Development Lead (Back-End Focus)

Jul 2024 – Aug 2024

- Directed** overall team output and development workflow through mentorship and technical guidance, ensuring the successful delivery of high-quality, client-facing solutions.
- Developed and maintained core web application components leveraging **Vue.js**, **TypeScript**, and **JavaScript** while focusing on integration and back-end logic.

Fundación del Niño, Software Development Lead (Back-End Focus)

Sep 2024 – Feb 2025

- Led end-to-end development of a Windows Desktop Application utilizing **Python** and the PyQt framework, taking full project ownership from inception to deployment.
- Automated** crucial HR and payroll functions, replacing time-intensive manual processes to directly benefit **500 employees** and management, resulting in an estimated savings of **160 staff hours monthly**.

Adagames - Adakademy, Technical Judge

Feb 2025 – Jun 2025

- Evaluated and adjudicated** various competing teams and technical projects focused on initial software development (Scratch) and robotics challenges.
- Applied deep domain knowledge in software engineering principles to assess technical execution, problem-solving, and implementation strategies for emerging talent.

MSM INC, Software Engineer / Back-End Team Lead

Mar 2025 – Currently

- Spearheaded** the design and execution of technical project plans for assigned client projects, ensuring the team followed an optimized engineering roadmap and maintaining strict internal delivery standards.
- Engineered scalable RESTful APIs using **Django (Python)** and **Node.js (JavaScript)** to handle high-volume data requirements for multiple concurrent projects, enabling seamless and efficient inter-system communication.
- Designed and managed robust relational databases (**MariaDB/MySQL**) for various client solutions, optimizing schema and complex queries to ensure high data integrity and rapid retrieval speed.
- Provided technical guidance and mentorship to the development team, directing tasks and processes to accelerate project velocity and maintain high-quality internal delivery metrics.

EDUCATION

Bachelor of Science in Computer Science - Universidad Gran Mariscal de Ayacucho | 2022 - 2026

Barcelona, Anzoátegui, Venezuela

- Expected Graduation: June, 2026

TECHNICAL SKILLS

Back-End/Frameworks: Python (Django), Node.js (Express)

Front-End/Frameworks: React, Vue.js, TailwindCSS

Languages/Front-End: JavaScript, TypeScript, HTML5, CSS3

Databases: MySQL, MariaDB, SQL, PostgreSQL

DevOps/CI/CD: Docker, GitHub Actions, Git, Linux

IDEs: VS Code, Vim, NeoVim

PROFESSIONAL SKILLS

Technical Leadership

Complex Problem Solving

Adaptability

Cross-functional Communication

Mentorship & Coaching

Time Management

LANGUAGES: SPANISH (**NATIVE**) | ENGLISH (**C1**) | GERMAN (**B1**)
